Non-Tenure-Track Lecturer Position in Civil and Mechanical Engineering

The School of Environmental, Civil, Agricultural and Mechanical Engineering at the University of Georgia (UGA) invites applications for a non-tenure-track Lecturer position to begin in August 2017. The School of Environmental, Civil, Agricultural and Mechanical Engineering is one of the three schools in the College of Engineering at UGA, which is one of the newest engineering colleges in the nation. The school consists of four undergraduate degree programs (Environmental, Civil, Agricultural and Mechanical engineering) as well as four graduate programs including M.S. in engineering and Ph.D. in engineering. Due to the unprecedented growth of our undergraduate programs, the primary duty of the selected candidate will be to teach 12 credit hours per semester. Successful applicants must be able to teach courses in Engineering Mechanics area. Specifically, this position will involve teaching core undergraduate engineering courses and supporting instruction efforts for the following courses: Statics, Dynamics, Fluid Mechanics, Thermodynamics and Heat Transfer. Special consideration will be given to candidates who are capable of also teaching courses in engineering economics. A Ph.D. in Engineering or related discipline is required. Position responsibilities include effective classroom teaching of undergraduate courses, laboratory supervision, mentoring undergraduate engineering students, and working with other faculty on innovative teaching methods within the college's growing instructional programs. Effective communication skills are required. The university offers campus wide programs to enhance the teaching skills of instructors.

About the College of Engineering: Described as a college without boundaries, UGA's College of Engineering, formed on July 1, 2012, reflects a new paradigm for interdisciplinary engineering education that fosters engineering education in a liberal arts environment and research in areas inspired to solve real-world problems. While engineering is a UGA tradition dating back to the 1850's, in the modern era, the rapidly expanding UGA engineering program focuses on opportunities for learning, research and outreach at the confluence of disciplines. This open structure provides an unrestricted environment for collaborations within and outside of typical engineering disciplines. The College offers eight undergraduate and seven graduate engineering degree programs in all engineering fields. Additional information is available at <http://www.engr.uga.edu/>.

The first state-chartered university in the country, this land grant and sea grant research university is located in Athens, GA, about 60 miles from Atlanta, with 36,000 students, enrolled in 17 schools and colleges, and 1800 faculty. For many reasons, Athens is consistently voted among the best municipalities in America. <http://www.forbes.com/places/ga/athens/>; <http://www.athensclarkecounty.com/>.

Application Procedure: To apply, candidates should submit (1) letter of application indicating your teaching experience and interests, (2) curriculum vitae, (3) teaching philosophy/statement not exceeding 2 pages (4) unofficial transcripts, and (5) contact information for three references. Please submit applications at the following website: <http://facultyjobs.uga.edu/postings/1962>. Questions related to the position may be directed to the school chair Dr. Sidney Thompson, Ph.D., Email: sidt@engr.uga.edu; Telephone: (706) 542-0873.

The position will be open until filled. Applications received by April 30, 2017 will be given full consideration.

The University of Georgia is an Equal Opportunity/Affirmative Action employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability, gender identity, sexual orientation or protected veteran status.
